Jobs in key non-farm sectors grow marginally since 2nd Covid wave

FE BUREAU
New Delhi, April 28

EMPLOYMENT IN NINE select non-farm sectors stood at 31.45 million in the October-December 2021 quarter, just 0.39 million more than the July-September period and 0.65 million higher than April-June, 2021, according to the third quarterly employment survey (QES) by the labour ministry released on Tuesday.

QES provides short-term employment assessment in establishments employing 10 or more workers, mostly in the organised segments, for nine selected sectors — manufacturing, construction, trade, transport, education, health, accommodation & restaurants, IT/BPOs and financial services.

The QES data showed that even as the second Covid wave abated, the employment scenario during the October-December period improved only marginally.

The government, however,

claimed the QES report indicated an "increasing trend in employment in organised segment employing 10 or more workers."

The second Covid wave hit the country in April 2021. The third QES revealed that during October-December

2021, employment rose in six sectors — manufacturing, construction, health, accommodation & restaurant, IT/BPO and financial services sectors over the previous quarter. However, employment fell sequentially in sectors like trade, transport and
