#### NOTICE CUM ADDENDUM NO. 38 of 2024 (Contd.)

Particulars	1 STOCK AND THE PROPERTY OF TH	Proposed Scheme Features (Changes highlighted)
Investment	NotAvailable	Corporate Action / Event Driven Strategies:  a) Dividend Arbitrage Around Dividend declaration time; the stock futures/options arbitrage market can provide a profitable opportunity. Generally, stock price declines by the Dividend amount when the stock gees ex-dividend.  b) Bu-pBack Arbitrage When the Company announces the buy-back of its shares, there could be opportunities due to price differential in the buyback p and traded price.  c) Merger When the Company announces merger, amalgamation, hive-off, de-merger, etc., there could be opportunities due to price differential in the buyback p and traded price.  c) Merger When the Company amnounces merger, amalgamation, hive-off, de-merger, etc., there could be opportunities due to p differential in the cash and the derivative market.  Covered Call Options Strategy Under para 12.25 of SEBI Master Circular dated May 19, 2023 ("Master Circular"), the mutual fund schemes are permitted to write options under a covered call strategy as per the prescribed guidelines.  Covered Call Option Strategy: A call option gives the holder (huyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset to generat income stream.  Benefits of using Covered Call Strategy in Mutual Funds: The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted return the Scheme. This strategy is also employed when the Fund Manager has a short-term neutral view on the asset and for this reason b the asset long and simultaneously skees about prosition via covered call potion neutral view on the asset and for this reason b the asset long and simultaneously skees as the prosition via covered call potion manager will be constituted by the mutual fund scheme, downside from fall in the stock price would be lower to the extent of the premium cannel from the call option.  Busines
Risk Factors	*	Net Gain - Rs. 50.  The following details will be included under the existing section on Risk Factors: Risks of writing covered call options for equity shares:  a) Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strat the profits from call option writing is capped at the option premium, however the downside depends upon the increase in valt the underlying equity shares. This downside risk is reduced by writing covered call options.  b) The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regula requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are so the maximum extent allowed by regulatory authority, the scheme may not be able to self the underlyiny shares immediate the view changes to self and exit the stock. The covered call options need to be unwound before the stock positions calliquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which call point contracts! been written become illiquid. Hence, the scheme may not be able to self the underlying equity shares, which can lead to tempo illiquidity of the underlying equity shares and result in loss of opportunity.  c) The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares when the appreciation in equity share price is more than the option permiture review the scheme would be at a loss.  d) The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets o scheme. This may restrict the ability of Scheme to but/write any options.
What are the Investment Restric- tions		The following details will be included under the existing section on 'Whatare the Investment Restrictions':  Investment Restrictions for Covered Call strategy:  The scheme can write Call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject the following:  a) 'The total notional value (taking into account strike price as well as premium value) of call options written by the scheme shall exceed 15% of the total market value of equity shares held in the scheme.  b) 'The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a partic company held in the scheme. The unencumbered shares in the scheme shall mean shares that are not part of Securities Lending Borrowing Mechanism (SLMM), margin or any other kind of cenumbrances.  c) At all points of time the scheme shall comply with the provisions at points (a) and (b) above. In ease of any passive breach of requirement tayrangraph (a) showe, the scheme shall naver 'Tanding days to rebalance the portfolio, During the rebalancing per no additional call options can be written in the scheme.  d) In ease the scheme health virte a call option without holding the underlying equity shares. A call option can be written only shares which are not begind using other derivative contracts.  1) The premium received shall be within the requirements stated in paragraph 12.25 of the Master Circular.  2) The resposure on account of the call option written under the covered call strategy shall not be considered as exposure in term paragraph 12.24 of the Master Circular.  3) The premium received shall be market on market daily and the respective gains or losses factored into the daily NAV of the schuril the option of the call option written under the covered call strategy shall not be considered as exposure in term paragraph 2.24 of the Master Circular.
